

A 3D perspective view of a grid of white cubes. One cube in the upper right quadrant is red and stands slightly higher than the others, which are all white and of uniform height. The lighting creates soft shadows, giving the cubes a three-dimensional appearance.

Ways of Story Estimation Require Evolution

Good estimation helps product owners optimize for efficiency and impact. That's why it's so important.

Drawbacks of playing poker and alternative ways may influence accuracy and efficiency of estimation.

Real Poker

Cumbersome,
especially in a large
team

Calculator

Mental hints cause a
deviation from the
real estimation

Following tech lead

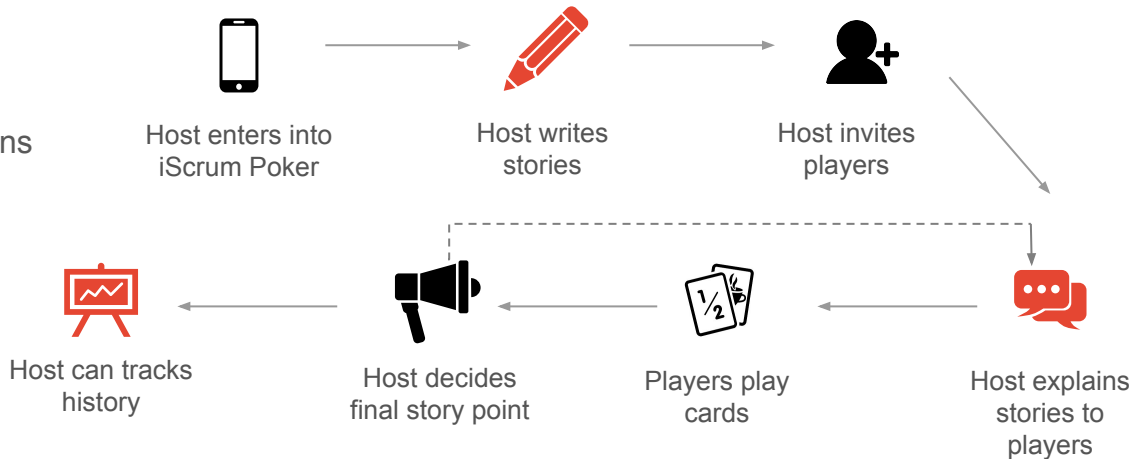

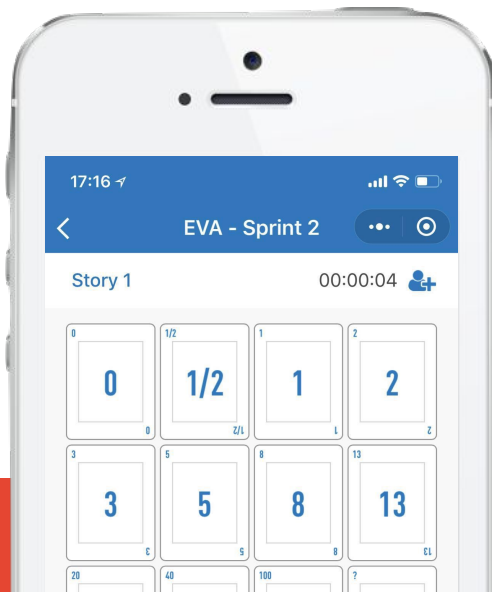

Herd Behavior. Prone
to lead's estimation.

App

Drama Queen.
Complicated and
unnecessary.

Our Solution & Distinctive Competency

- Play online anywhere and anytime
- Unlimited players
- Customized settings
- Multiple calculation methods for suggestions
- Tracking estimation history

With iScrum Poker, agile project planning and estimation will be

Accurate

Simple

Effortless

Huge potential for using WeChat as a tool for Agile project planning

Mini app together with Progress Web App, Instant App offer a new paradigm for mobile apps

What are monopolizing users' attention?

- Faster loading
- Slimmed-down mobile experience

As of January 2018, over

170 million

Mini program users

More than **580,000**
mini programs

74%

74% scrum projects estimate the projects with story points.

26%

WeChat users reach 889m, growing by 26.2%

80%

80% of them use WeChat for business and work purpose.

** 11th annual state of agile report, VersionOne. July 2017.*

A man with curly hair, wearing a light-colored jacket with a dark hood and dark pants, stands with his hands in his pockets. He is positioned in front of a blurred train, creating a sense of motion. A semi-transparent red horizontal band is overlaid across the middle of the image.

What's The Future: Skill Maturity Management Platform

For Host, it could help to retrospect and assess every developer's skill maturity or even business analyst's:

- Whose estimation is always far from the final score?
 - Give a notification
- How is the story readiness?
 - Leverage the estimation time per story per point

Thank you for your time!
